

Russell Dudek

Enterprise AI Adoption | Operating Systems | People-First Change

Pittsburgh, Pennsylvania | Actively relocating to Tampa Bay, Florida | 412.287.8640 | russelldudek@gmail.com
[linkedin.com/in/russelldudek](https://www.linkedin.com/in/russelldudek) | <https://russelldudek.github.io/SupplyHouse/>

Operator-technologist who turns emerging technology into adopted work

Builds operating mechanisms that connect business outcomes, workflow design, technical teams, human authority, enablement, governance and measurable evidence.

Immediate contribution profile

- Read the work: Gemba-style observation, workflow mapping, stakeholder listening and skepticism as design input.
- Fit the technology: define AI role, trusted context, human authority, ownership, controls and evaluation as one operating design.
- Install capability: build standards, training, feedback loops, scorecards and reusable patterns so adoption compounds.

Professional experience

Vape-Jet | Director of Operations | 2025-Present

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry and AI-assisted workflows.
- Connects factory, field, customer and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training and accountability.
- Works directly in a robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth | Founder / AI and Automation Advisor | 2017-Present

- Develops AI-readiness and opportunity frameworks assessing value, feasibility, data readiness, governance, adoption burden, reuse and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, evaluation and governance rails.

Amazon | Operations Management / Site Leader | 2014-2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work and operating mechanisms across safety, quality, customer experience and engagement.

Professional experience continued

Compunetics | Director of Operations and Engineering Management | 2000-2013

- Progressed through R&D program management, production management, strategic acquisition, operations management and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures and process controls; collaborated with DoD, CERN, Intel and AMD.
- Published industry articles, delivered technical talks and participated in the HyperTransport Consortium.

Cardinal Building Products | Regional Director | 2021-2023

- Built the company's first remote regional operation and modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO and online-buying workflows.

ZeusVu | Chief Pilot, Autonomous Systems and Aerial Data Operations | 2018-2022

- Led regulated drone operations with a 100% safety record and no FAA incidents; developed TensorFlow-based concepts for automated aerial inventory and field intelligence.

Leadership, education and credentials

- Enviro Social Capital | Chairman of the Board: co-founded a public-private impact initiative and helped shape a \$200 million Social Impact Bond feasibility concept.
- IEEE | CMPT and EDS Pittsburgh Chapter Chair: led regional programming connecting industry, academia, manufacturing and emerging technology.

University of Pittsburgh | Bachelor of Science

Academic grounding includes materials science, physical chemistry and biology-related studies.

Credentials

Google AI Essentials | Food Safety Management Certification | IBM Enterprise Design Thinking Practitioner | Six Sigma Certification | OSHA 10

Technical and operating toolkit

Agentic AI | LLM workflows | RAG patterns | Human-in-the-loop design | Python | SQL | JavaScript | TensorFlow | Tableau | ERP/Odoo | Jira | Confluence | HubSpot | Slack | GIS and mapping workflows

How I would contribute at SupplyHouse

Fit AI to the work. Bring the people with it. Connect enterprise standards to locally owned workflows; pair use-case selection with explicit human authority, enablement and evidence; and build a practical Center of Excellence and ambassador system that helps proven patterns travel.
