

Director of Enterprise AI Adoption

Operator-technologist · Enterprise change · AI-enabled work · Measurable adoption

Operator-technologist with 20+ years leading complex technical, operational and commercial change. Repeatedly translates emerging technology into visible work, named ownership, frontline routines, executive decisions and measurable outcomes. Brings an unusual combination of hands-on AI workflow design, Lean/Gemba operating leadership, enterprise-system adoption, high-reliability engineering and executive-to-frontline communication.

RELEVANT EXPERIENCE

Director of Operations

2025-Present

Vape-Jet · Software-enabled robotics and precision automation

- Lead an AI-first operating transformation across production, purchasing, quality, customer success and support, engineering issue flow and enterprise systems.
- Connect Odoo, Jira, HubSpot, Slack, machine telemetry and AI-assisted workflows into a more visible, accountable operating system.
- Build standard work, decision routines and cross-functional escalation mechanisms around a fielded base of approximately 1,000 robots.
- Translate factory, field, customer and machine signals into priorities for operations, engineering and service.

Founder / AI and Automation Advisor

2017-Present

DudeWorth

- Develop AI-readiness and opportunity frameworks that connect business value, feasibility, data, governance, adoption and time to value.
- Design agentic workflow concepts combining structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation and controls.
- Advise on operations, logistics, warehouse automation, AMRs, AS/RS, cobots, transportation, network design and AI-enabled workflows.
- Create practical operating artifacts that let leaders prioritize, test and govern AI opportunities rather than merely discuss them.

Operations Management / Site Leadership

2014-2018

Amazon

- Led 24/7 Prime operations in Pittsburgh supporting approximately five million second-day orders annually.
- Supported launch work for Prime Now with Whole Foods, translating new service promises into labor, throughput, escalation and standard-work routines.
- Used Lean, Six Sigma and Gemba methods to identify friction, coach teams and improve operational execution.
- Communicated across frontline, technical and leadership teams in high-volume, time-sensitive environments.

ENTERPRISE AI ADOPTION STRENGTHS

- Use-case discovery and prioritization
- Change leadership and psychological safety
- AI ambassadors and role-based enablement
- Human-in-the-loop workflow design
- Responsible AI and decision rights
- Business cases, ROI and value evidence
- Executive and frontline communication
- Vendor and cross-functional leadership

AI AND DATA TOOLKIT

LLMs Agentic AI RAG HITL Python
SQL TensorFlow Tableau

OPERATING SYSTEMS

Odoo · Jira · Confluence · HubSpot · Slack · CRM
· ERP · TMS · telemetry · workflow automation

LEADERSHIP METHODS

Lean · Gemba · Six Sigma · standard work · root cause · continuous improvement · Design Thinking

TECHNICAL-SUPPLY CONTEXT

Building products, manufacturing, logistics, field service and robotics.

ADOPTION MECHANICS

Frontline listening, standard work, coaching, safe escalation and cross-functional ownership.

VALUE EVIDENCE

Cycle time, quality, adoption, confidence, rework and traceability—measured before scale.

Experience, credentials and operating evidence

Strength-first continuation

ADDITIONAL LEADERSHIP EXPERIENCE

Director of Operations and Engineering Management

2000-2013

Compunetics

- Led work across engineering, manufacturing, quality, customer delivery and high-reliability process environments.
- Built quality systems, standard work, root-cause routines, process controls and metrics for complex technical programs.
- Served as a technical and commercial liaison with organizations including DoD programs, CERN, Intel, AMD and industry consortium partners.
- Translated between materials science, high-speed electronics, manufacturing constraints and customer requirements.

Regional Director

2021-2023

Cardinal Building Products

- Established the company's first remote regional operation and modernized distributed CRM, commercial, fulfillment and logistics workflows.
- Connected sales, customer commitments, inventory, routing and service execution across dispersed teams.
- Developed AI-enhanced transportation and route-optimization concepts grounded in operating reality.

Chief Pilot, Autonomous Systems / Aerial Data

2018-2022

ZeusVu

- Led regulated drone operations with a 100% safety record and developed concepts for machine vision, TensorFlow-based detection and aerial inventorying.
- Designed chain-of-custody and ground-truth approaches for converting sensor data into trusted operational evidence.

EDUCATION AND CREDENTIALS

University of Pittsburgh · Bachelor of Science · Academic grounding in materials science, physical chemistry and biology-related study.

Credentials: Google AI Essentials · IBM Enterprise Design Thinking Practitioner · Six Sigma · OSHA 10 · Food Safety Management.

HOW THE EXPERIENCE MAPS TO SUPPLYHOUSE

People-first adoption

Frontline operating leadership, coaching, standard work and safe escalation across high-volume and technically complex settings.

Trades and hard-parts context

Building products, manufacturing, logistics, field service, robotics and technical customer environments.

Enterprise AI operating model

AI readiness, agentic workflows, governance, human authority, value measurement and reusable operating mechanisms.

Executive credibility

Business cases, cross-functional decisions, technical translation and outcome accountability across long career spans.

SELECTED OPERATING MECHANISMS

- AI use-case commissioning criteria
- Role-based enablement and office hours
- Ambassador networks and feedback loops
- Decision-rights and escalation maps
- Adoption, confidence and value scorecards
- Pilot-to-pattern learning reviews

ROLE THESIS

Make AI useful enough to trust—and trusted enough to scale.

Each use case should enter through real work, retain named human authority, have a business owner and return measurable evidence before it spreads.

LOCATION AND TRAVEL

Pittsburgh, PA. Actively relocating to Tampa Bay, Florida. Available for required travel to Melville, NY.

CANDIDATE VISION

AI Adoption Manifold, 120-day plan and workflow commissioning review included with the application package.
