

Operator-technologist who turns emerging technology into adopted work.

Builds visible operating mechanisms that connect business outcomes, workflow design, technical teams, human authority, enablement, governance and measurable evidence.

ROLE-ALIGNED CAPABILITIES

Enterprise AI adoption AI strategy and use-case portfolios Change leadership Role-based enablement Human-in-the-loop design
AI governance and evaluation Business cases and ROI logic Cross-functional operating cadence Executive communication

IMMEDIATE CONTRIBUTION PROFILE

Read the work

Uses Gemba-style observation, workflow mapping, stakeholder listening and skepticism as design input.

Fit the technology

Defines AI role, data context, human authority, ownership, controls and evaluation as one operating design.

Install capability

Builds standards, training, feedback loops, scorecards and reusable patterns so adoption compounds.

PROFESSIONAL EXPERIENCE

Vape-Jet • Director of Operations

2025–Present

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry and AI-assisted workflows.
- Connects factory, field, customer and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training and accountability.
- Works directly in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth • Founder / AI and Automation Advisor

2017–Present

- Develops AI-readiness and opportunity frameworks assessing value, feasibility, data readiness, governance, adoption burden, reuse and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis and workflow design.

Amazon • Operations Management / Site Leader

2014–2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work and operating mechanisms across safety, quality, customer experience and team engagement.
- Served on the Amazon Prime Now launch team with Whole Foods and applied Lean and Gemba practices to adoption and execution.

PROFESSIONAL EXPERIENCE CONTINUED

Compunetics · Director of Operations and Engineering Management

2000–2013

- Progressed through R&D program management, production management, strategic acquisition, operations management and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures and process controls; collaborated with high-consequence customers and partners including DoD, CERN, Intel and AMD.
- Published industry articles, delivered technical talks and participated in the HyperTransport Consortium.

Cardinal Building Products · Regional Director

2021–2023

- Built the company's first remote regional operation and modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts while connecting field, commercial and fulfillment teams.

ZeusVu · Chief Pilot, Autonomous Systems and Aerial Data Operations

2018–2022

- Led regulated drone operations across medical, energy, logistics, real-estate and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence; designed medical delivery and chain-of-custody concepts connecting technology, risk and governed execution.

SELECTED LEADERSHIP AND COMMUNITY WORK

Enviro Social Capital · Chairman of the Board

Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance and civic transformation; helped shape and evaluate a \$200 million Social Impact Bond feasibility concept.

IEEE · CMPT and EDS Pittsburgh Chapter Chair

Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing and emerging technology through conferences, seminars and technical programs.

EDUCATION AND CREDENTIALS

University of Pittsburgh · Bachelor of Science

Academic grounding includes materials science, physical chemistry and biology-related studies.

Credentials

Google AI Essentials · Food Safety Management Certification · IBM Enterprise Design Thinking Practitioner · Six Sigma Certification · OSHA 10

TECHNICAL AND OPERATING TOOLKIT

Agentic AI · LLM workflows · RAG patterns · Human-in-the-loop design · Python · SQL · JavaScript · TensorFlow · Tableau · ERP/Odoo workflows · Jira · Confluence · HubSpot · Slack · GIS and mapping workflows

HOW I WOULD CONTRIBUTE AT SUPPLYHOUSE

Fit AI to the work. Bring the people with it. I would connect enterprise standards to locally owned workflows; pair use-case selection with human authority, enablement and evidence; and build a practical Center of Excellence and ambassador system that helps proven patterns travel without turning adoption into a central bureaucracy.
